

Did you know:

a **leaky toilet**  
can **waste**  
**90**  
gallons  
a **day**

••••• Leaking toilets  
waste more water  
than any other  
household fixture.

Fixing a leaky toilet  
conserves water  
and saves money.

PRINTED APRIL 2009

A message from your local  
water provider in cooperation  
with the City of Everett.

Every  
drop  
counts.

••••• a simple kit  
to detect  
leaks.

Use the attached dye kit to detect a leaky toilet.

## DIRECTIONS:

1. Remove the tank cover, drop ONE dye strip or tab into the toilet tank.
2. DO NOT FLUSH.
3. Wait 20 minutes.
4. If the water in the bowl remains clear, no leaks have been detected.

**If the water in the bowl turns blue,** there is a leak in the tank. The repair may be a simple one. Learn how to do-it-yourself by going to [www.ci.everett.wa.us/conservation](http://www.ci.everett.wa.us/conservation) and clicking on "Fix a Toilet Leak" or contact a licensed plumber.

For additional leak detection kits contact your local water provider.

Use  
this  
dye kit  
to detect  
a leaky toilet.

We all share the same water. Please use it wisely.
