P: 206-583-0655 or 1-800-227-0977

E: [waterworkshops@triangleassociates.com](mailto:waterworkshops@triangleassociates.com)

This workshop helps students meet performance expectations on ecosystems and can easily be incorporated into land and water units.

Students examine how bugs are indicators of watershed health. They view a demonstration and role-play a bug trying to survive in polluted water. Students learn specific actions they can take to help keep surface water and watersheds healthy.

**Key lesson messages:**

- What a watershed is
- How bugs are a sign of surface water health
- How actions impact stream and watershed health

"Activities were very student-centered." -4<sup>th</sup> grade teacher

"It matches the 3<sup>rd</sup> grade state science standards." -3<sup>rd</sup> grade teacher
