

# Outdoor Water

Water wisely.

Use a hose nozzle and soil moisture meter, free while supplies last.

# Save Water Outdoors

In the summer, household water use can double.

## Conserve water outdoors:

- Use a shut-off nozzle when watering by hand.\*
- Use an automatic water shut-off timer.\*
- Use a soil moisture meter to avoid over-watering.\*
- Water your lawn every third day if needed.
- Adjust sprinklers so only your yard is watered.
- Raise your lawn mower blades, taller grass holds moisture longer.
- Clean sidewalks and patios with a broom, not the hose.

*\*FREE while supplies last.*
