## **Paving work begins July 6**

Expect street closures and traffic delays

EVERETT, WA – Street resurfacing is scheduled for several locations in Everett beginning Tuesday, July 6, and continuing through September. Crews will grind down and remove old pavement, install new traffic signal detection wires, and repave and restripe roadways.

Construction on Casino Road (from 5th Ave to Evergreen Way), Evergreen Way (from E Casino Rd to Holly Drive), and Broadway (from 15th to 18th St) will involve both day and night work. No night work is planned for the remaining streets, but schedules could change depending on weather and other factors.

Signs will be posted advising motorists of detours, street closures and parking restrictions. The City's contractor, Lakeside Industries, is responsible for notifying affected homes and businesses prior to construction.

The overlay project is an annual asset management project to repair and maintain street surfaces for safety and ride-ability and is necessary for the long-term health of the City's transportation network.

More information about the pavement overlay program, including a list and map of all impacted streets, is available at [everettwa.gov/overlay](http://everettwa.gov/overlay)
