Paving work begins July 5

Expect street closures and traffic delays

EVERETT, Wash. – Street resurfacing is scheduled for several locations in Everett beginning Tuesday, July 5, and continuing through September. Crews will grind down and remove old pavement, install new traffic signal detection wires, and repave and restripe roadways.

Signs will be posted advising motorists of detours, street closures and parking restrictions. Some work will occur as early as 6 a.m. on weekdays. Businesses and residences directly impacted by construction may be provided detailed information prior to construction.

The overlay project is an annual asset management project to repair and maintain street surfaces for safety and ride-ability and is necessary for the long-term health of the City's transportation network.

More information about the pavement overlay program, including a list and map of all impacted streets, is available at everettwa.gov/overlay.
