

Did you know:

a **toilet leak**
can **waste**
90
gallons
a **day**

••••• Leaking toilets waste more water than any other household fixture.

Fixing a toilet leak conserves water and saves money.

JANUARY 2020

Brought to you by the City of Everett and your local water provider.

Every drop counts.

••••• a simple kit to detect leaks.

Use the attached dye kit to detect a toilet leak.

DIRECTIONS:

1. Remove the tank cover, drop ONE dye strip or tab into the toilet tank.
2. DO NOT FLUSH.
3. Wait 20 minutes.
4. If the water in the bowl remains clear, no leaks have been detected.

If the water in the bowl turns blue, there is a leak in the tank. The repair may be a simple one. Take steps to repair the leak yourself or contact a licensed plumber.

For additional leak detection kits, contact your local water provider.
